BISG Additional
Extra-Curricular Clubs

If students are interested in an academic club that is not currently offered within the CoLab structure (for example, a Mathematics Club or Astronomy Club), they may propose the creation of an additional club.

To submit a proposal, students must identify at least five students who would be interested in participating. Five students is the minimum number required for an additional club to be considered.

Applications should be submitted in writing to the Legionów Director in the school office and should include the proposed name and focus of the club, together with the names of the interested students.

Applications will be reviewed by the Director of the Legionów Campus. Where there is sufficient student demand, the school will make reasonable efforts to organise the club, subject to staff availability, timetable constraints, and other organisational considerations.
